

Alternative Provision Listing.

Name of Organisation

Sunflower Education CIC

Description of Organisation

Sunflower Education CIC is a Primary Phase Alternative Provider in Moira, Swadlincote. We support children who are struggling in the mainstream system, their schools and families. We are passionate about future equality and empowering children with neurodivergencies to understand and embrace themselves. We use a neurodivergency-affirming social communication intervention to support this. We help children learn valuable communication strategies while simultaneously supporting their self-esteem and self-image, instilling a mindset of being proud of who they are. We are Sensory Accredited Practitioners and recognise the enormous impact children's sensory needs have on their ability to concentrate and learn. For this reason, every child that attends Sunflower Education CIC will have a sensory profile formulated, a sensory diet written and every learning day begins with a structured sensory circuit. Our mental health and wellbeing curriculum is targeted in a modular way to ensure children are given optimal input in areas that reflect their needs and we support national curriculum outcomes by engaging children in Project-Based Learning opportunities. We are responsive and take advantage of in-the-moment learning. In order to record this dynamic curriculum effectively and effectively share progress in ALL areas with children, families and schools in real time, we use Kinteract as our recording and monitoring platform. We work together to achieve success for our children. Every child deserves to thrive and feel confident about who they are. Every child deserves to understand themselves. At Sunflower Education CIC everyone's gifts are treasured!

Age Range of Provision

5-11

Costs of Provision
